Before Beginning

Read and understand the owners manual.

To avoid muscle strain or any other injury, use lifting aids and proper lifting techniques while moving heavy objects.

CARELESS INSTALLATION AND OPERATION CAN RESULT IN SERIOUS INJURY OR EQUIPMENT DAMAGE. READ AND UNDERSTAND ALL SAFETY PRECAUTIONS AND OPERATING INSTRUCTIONS BEFORE INSTALLING AND OPERATING THIS PRODUCT. SEE OWNERS MANUAL FOR ALL SAFETY PRECAUTIONS.

Hitch Assembly

Remove the 1" x 7" Gr8 YZ Hex Bolt and 1" Gr2 Z Centerlock Hex Nut from the hitch. Detach the hitch from the 2-7/8" shaft.

Remove the 1" x 5-1/2" Gr5 Hex Bolt and 1" Centerlock Hex Nut and take out the hitch bar.

Route the Weigh Bar wire. Feed the wire through the auger side of the A-frame tubing and exit the frame through the hole located directly behind the front leg on the grain cart.

Hitch Assembly

When installing the front hitch weigh bar make sure the sticker is facing out and arrow on the sticker is pointed up.

Assemble hitch weigh bar with a 1" x 5-1/2" Gr5 Hex Bolt and 1" Centerlock Hex Nut. Attach the hitch using the 1" x 7" Gr8 YZ Hex Bolt and 1" Gr2 Z Centerlock Hex Nut.

Axle Assembly

Detach the Axle Weldment by removing (8) 1" x 3" Gr5 Z Hex Bolts, (8) 1" Zinc Finish Lock Washers and (8) 1" Gr5 Z Hex Nuts.

Install the (4) Axle Weigh Bars onto the Axle Weldment. Use (4) 1" x 5-1/2" Gr5 Z Hex Bolts and (4) 1" Gr5 Z Nylon Locking Hex Nuts to install the Weigh Bars. **Tighten hardware once installed.**

*Sticker with the arrow end goes into the axle and points up.

Install the Spindle Mount Weldments. There are two different mounts. The cut out corner needs to face the outside of the cart. Use a 1" x 5-1/2" Gr5 Z Hex Bolt and a 1" Gr5 Z Nylon Locking Hex Nut to install each Spindle Mount Weldment.

Tighten hardware once installed.

Axle Assembly

Attach the Axle Weldment to the A-Frame.
Use (12) 1" x 3" Gr5 Z Hex Bolts, (12) 1" Zinc
Finish Lock Washers and (12) 1" Gr5 Z Hex Nuts.
Tighten hardware once installed.

Install the wire looms around all four wires entering
the A-Frame from the Axle Weigh Bars. Feed the lefts
side Weigh bar wires through the hole located directly
above the Axle Weldment towards the front of the cart.
The wires need to come out of the hole located directly
below the left side leg.

The right Weigh bar wires need to be routed down
the right leg of the A-frame, out the hole next to the
crossbrace, through the conduit, into the left A-frame
bar to the same hole the left Weigh Bar wires come out
of.

Wire Loom

Before routing the rear Weigh Bar wires, label the
wires by wrapping electrical tape around the rear
left Weigh Bar once and the rear right Weigh Bar
twice. This will help identify wires when it is time
to install the Junction Box.

Mounting Junction Box

For Models 1012-1412

Install the Junction Box.

Use double sided tape and apply them to the back of the junction box. Press the junction box to the inside of the front leg as shown in the image. Placement should be about 5" above the frame tubing and nearby the hole in the frame where the wires from the weigh bars are coming out.

Remove cover on junction box.

Install the wires from the Weigh Bars to the Junction Box. The wires from the indicator box go to the plug at the bottom. Wires from the Hitch Weigh Bar go to the plug 2nd from the bottom. The Axle Weigh Bar wires go to the top four plugs in the order specified in the following image. Each wire goes to the corresponding color on each plug.

Replace cover on junction box.

Mounting the Scale Indicator

Secure the mounting bracket to the front leg using two 3/8" x 1" serrated flange hex nuts and bolts located in the image below. Slide the Indicator across the top of the mounting bracket and secure using two #10 hex bolts and nuts. **Tighten hardware once finished.**

Connect the Junction Box Cable to the port on the bottom of the indicator. To connect the Power Cord to the Indicator Box, attach screw plug end of the Power Cord into the power port of the Indicator box. Connect to on of the power ports from the wiring harness. Be sure any additional wires provided by the Power Cord are properly stored and secured.
